KKDIK (Turkish-REACH) Compliance Statement

On 23 June 2017, the Turkish Ministry of Environment and Urbanization (“MoEU”) published its REACH-like regulation known as “KKDIK”, which came into effect on 23 December 2017. The KKDIK regulation requires companies to register all substances manufactured in Turkey or imported into Turkey with volumes above 1 t/y. KKDIK, as with EU REACH, opened a pre-registration period. All substances pre-registered will be granted a grace period until the registration deadline.

As your supplier of chemical products, we fulfil the requirements of the KKDIK Regulation (By-Law on Registration, Evaluation, Authorization and Restriction of Chemicals) and preregister (pre-SIEF), its substances imported into Turkey.

All constituents of products sold in Turkey have been preregistered. The constituents are listed in the table:

Substance Name	EC No
Chromium	231-157-5
Cobalt	231-158-0
Iron	231-096-4
Molybdenum	231-107-2
Nickel	231-111-4

We have appointed an Only Representative (“OR”) based in Turkey to perform its pre-registration and registration obligations pursuant to the KKDIK regulation.

Only Representative (OR) :
CRAD Çevre Risk Analiz Den. Eğt. Hiz. A.Ş.
Atakent Mah. Türkler Cad. Göktürk Sk. No:8A
Ümraniye - İstanbul - Turkey
