

Recommended storage conditions

Höganäs brazing paste cartridges

Delivery

The cartridges are available in different sizes containing 0.6-12 kg brazing paste.

Storage

Cartridges should be stored vertically, as delivered, under clean and dry conditions at all times.

Shelf life for origin-closed cartridges is stated on the label, typically 3-6 months depending on paste type.

Cardboard boxes should not be stacked during storage.

The recommended storage temperature is:

4-30 °C

The cartridges are available in different sizes

Cartridges should be stored vertically
