

ABRIL 1091

An Outstanding Internal / External Lubricant

Defoamers in aqueous based systems and water treatment

Defoamers are a necessary part of formulations for paints and many industrial processes such as paper mills and water treatment systems. Abril 1091, micronised to a D50 of 6 microns, is recommended in the production of defoamers.

Typical Properties

Melting point	142-146 °C
Acid Value	<10 mg KOH/g
Amine Value	<10 mg KOH/g
Specific Gravity	0.99 g/cc
Gardner Colour	5 maximum
Flash Point	300 °C
Thermal Stability	Up to 290 °C

Abril 1091 is supplied in the form of Extra Fine Powder
